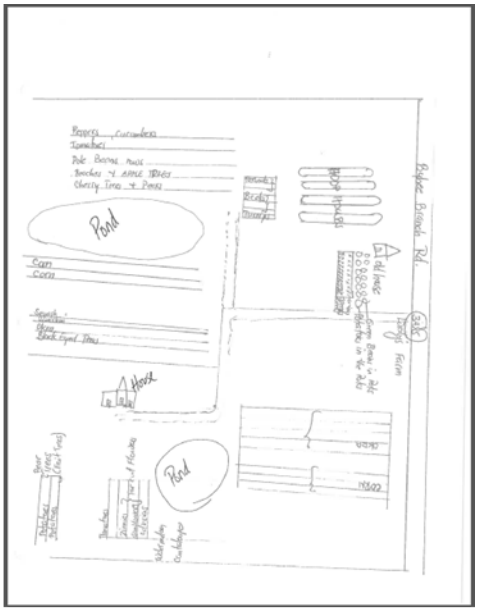
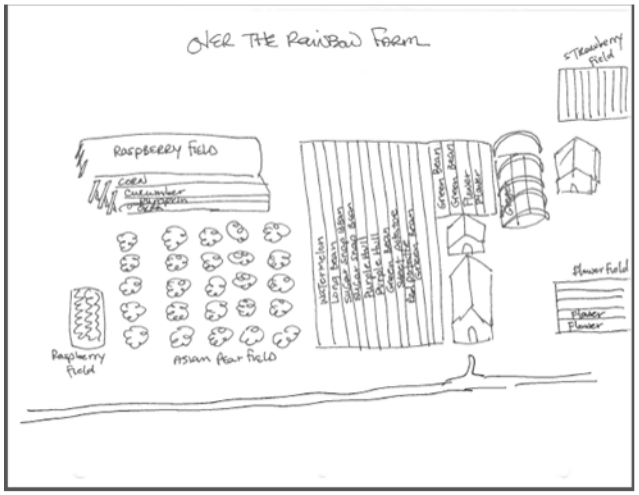
FARM MAP INSTRUCTIONS & EXAMPLES

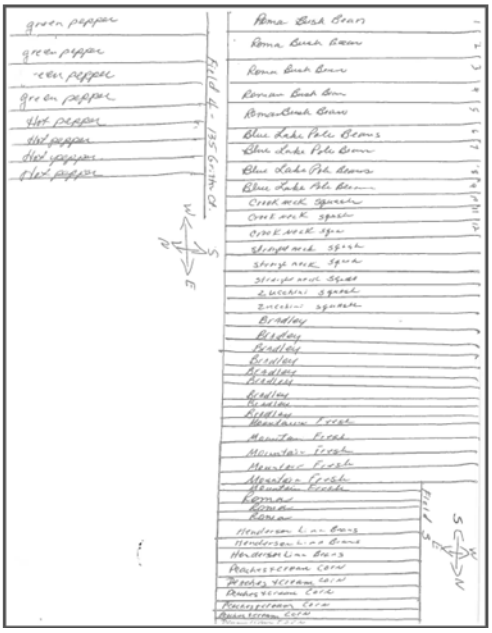
- Due to the remote location of many farms, include the farm address and directions. It is helpful if you note significant landmarks such as buildings, roads, etc.

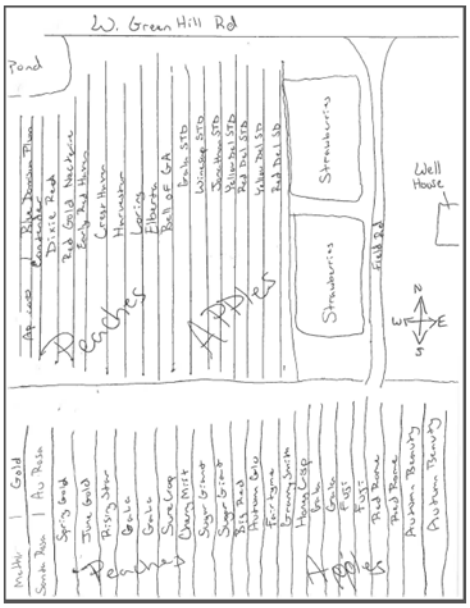
- Maps may be either hand drawn or digitally rendered. Here are several examples of acceptable field sketches.

- Maps need to be roughly to scale, and identify locations of crops

- Please note successive plantings on these maps, as well. For example, if you harvest all of your potatoes in a row and replace them with zucchini, write "potatoes/zucchini" in that area.








- Indicate number of fruit trees or shrubs, and approximate crop row lengths
